Statement of Capabilities

October 21, 2020

MWT Materials (and our predecessor, Millimeter Wave Technology) has been active in the research, development, analysis, and manufacture of radar absorbing materials and coatings (RAM) since the early 1980s. We are the premier provider of RF isolation products for the RFID, telecom, and aerospace industries, providing both absorption and isolation solutions to meet the customer's specific needs.

Our commitment to excellence has enabled us to achieve renowned customer satisfaction and performance.

Our overarching goal is to provide world class solutions and not oversell. To provide the best solution given the customer's technical, financial, and physical constraints in a timely and professional manner.

Core Capabilities

Our science based approach to resolution of RF compatibility and isolation issues has allowed us to provide unique and robust solutions in varied industries and government. Our hands on approach allows for testing, manufacture and qualification of product to meet those needs.

Services include:

- Consulting for design and performance requirements
- Consulting services and advice for third party solutions
- Consulting and support for Low Observable (LO) systems
- RF Control Product Design
- Direct customer interaction to ensure proper product selection
- Custom manufacture with performance validation and certifications
- In house production of RF Absorbing and Isolating products
- Product installation or drop shipping as required
- Custom test and measurement systems

Certifications

- Certified Small Business
- All products are ROHAS certified
- Test data per ASTM
- Product Certificates of Compliance

Major Clients

- US DOD
- US DOD Subcontractors
- RFID Integrators
